JOURNAL OF MOLECULAR CATALYSIS A: CHEMICAL

Author Index

Acosta, M., see Arnao, M.B. 179
Adnot, A., see Huang, M. 131
Akolekar, D.B.
Acidity and catalytic properties of $AlPO_4$-11, SAPO-11, MAPO-11, NiAPO-11, MnAPO-11 and MnAPSO-11 molecular sieves 93
Arnao, M.B., Hernández-Ruiz, J., Varón, R., García-Cánovas, F. and Acosta, M.
The inactivation of horseradish peroxidase by *m*-chloroperoxybenzoic acid, a xenobiotic hydroperoxide 179
Bandyopadhyay, R., see Singh, P.S. 101
Bautista, F.M., Campelo, J.M., Garcia, A., Guardeño, R., Luna, D. and Marinas, J.M.
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Beller, M., Cornils, B., Frohning, C.D. and Kohlpaintner, C.W.
Progress in hydroformylation and carbonylation 17
Bercaw, J.E., see Birnbaum, E.R. 119
Bettahar, M.M., see Demri, D. 237
Bhatt, K.N., see Chatterjee, D. 115
Birnbaum, E.R., Grinstaff, M.W., Labinger, J.A., Bercaw, J.E. and Gray, H.B.
On the mechanism of catalytic alkene oxidation by molecular oxygen and halogenated iron porphyrins 119
Boccuzzi, F., see Guglielminotti, E. 273
Bruk, L.G., Oshanina, I.V., Kozlova, A.P., Vorontsov, E.V. and Temkin, O.N.
Mechanistic study of acetylene carbonylation to anhydrides of dicarboxylic acids in solutions of palladium complexes 9
Budka, J., Hampl, F., Liska, F., Scrimin, P., Tecilla, P. and Tonellato, U.
Micellar nickel(II)-2-pyridineketoxime complexes as powerful catalysts of the cleavage of carboxylic acid esters in weakly acidic conditions 201
Cabrera, A., Peón, J., Velasco, L., Miranda, R., Salmón, A. and Salmón, M.
Clay-mediated cyclooligomerization of olefin oxides: a one-pot route to crown ethers L5
Cabrera, A., see Salmón, M. 127
Campelo, J.M., see Bautista, F.M. 229
Čapka, M., Czakoová, M., Hillerová, E., Paetzold, E. and Oehme, G.
[2-(3-Trimethoxysilylthio)ethyl]diphenylphosphine – a new agent for transition metal immobilization 123
Cárdenas, J., see Salmón, M. 127
Cavinato, G. and Toniolo, L.
Synthesis of γ-ketocycloalkanecarboxylic acid esters by region-specific alkoxy carbonylation of α,β-ketocycloolefins catalyzed by palladium 221
Chateau, L., see Demri, D. 237
Chatterjee, D., Mody, H.M. and Bhatt, K.N.
Conversion of cyclohexanol to dicyclohexyl ether catalyzed by cation-exchanged bentonite clays 115
Cho, I.H., Park, S.B. and Kwak, J.H.
Characterization of Mo/Al_2O_3 sol–gel catalyst by ^{27}Al nuclear magnetic resonance spectroscopy 285
Conceicao Cruz Costa, M., Johnstone, R.A.W. and Whittaker, D.
Catalysis of gas and liquid phase ionic and radical rearrangements of α- and β-pinene by metal(IV) phosphate polymers 251
Conte, V., Furia, F.D. and Moro, S.
Studies directed toward the prediction of the oxidative reactivity of vanadium peroxo complexes in water. Correlations between the nature of the ligands and ^{51}V-NMR chemical shifts 159
Cornils, B., see Beller, M. 17
Costisella, B., see Krause, H.W. 147
Czakoová, M., see Čapka, M. 123
Darensbourg, D.J., Stafford, N.W. and Katsurao, T.
Supercritical carbon dioxide as solvent for the copolymerization of carbon dioxide and propylene oxide using a heterogeneous zinc carboxylate catalyst L1
Demri, D., Chateau, L., Hindermann, J.P., Kiennemann, A. and Bettahar, M.M.
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
Deshpande, K., see Narayanan, S. 109
Dube, S., see Nageswara Rao, N. 197
Falabella Sousa-Aguiar, E., Mota, C.J.A., Murta Valle, M.L., Pinhel da Silva, M. and Forte da Silva, D.
Catalytic cracking of decalin isomers over REHY-zeolites with different crystallite sizes 267
Ferwerda, R., Van der Maas, J.H. and Van Duijneveldt, F.B.
Pyridine adsorption onto metal oxides: an ab initio study of model systems 319
Forte da Silva, D., see Falabella Sousa-Aguiar, E. 267
Frohning, C.D., see Beller, M. 17
Fuentes Mota, J., see Navio, J.A. 329
Furia, F.D., see Conte, V. 159
Garcia, A., see Bautista, F.M. 229
García-Cánovas, F., see Arnao, M.B. 179
Garcia Gómez, M., see Navio, J.A. 329

Garoff, T. and Leinonen, T.
Mn doping of the Ziegler–Natta PP catalyst support material 205
Gaviño, R., see Salmón, M. 127
Gray, H.B., see Birnbaum, E.R. 119
Grinstaff, M.W., see Birnbaum, E.R. 119
Guardeño, R., see Bautista, F.M. 229
Guglielminotti, E. and Boccuzzi, F.
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, NO–C_3H_8 reactions 273
Hampl, F., see Budka, J. 201
Hernández-Ruiz, J., see Arnao, M.B. 179
Hillerová, E., see Čapka, M. 123
Hindermann, J.P., see Demri, D. 237
Huang, J.-W., see Liu, Z.-L. 193
Huang, M., Adnot, A., Suppiah, S. and Kaliaguine, S.
XPS observation of surface interaction between H_2 and CO_2 on platinum foil 131
Jaeger, N.I., see Voskobojnikov, T.V. 299
Ji, L.-N., see Liu, Z.-L. 193
Johnstone, R.A.W., see Conceicao Cruz Costa, M. 251
Kaliaguine, S., see Huang, M. 131
Katsurao, T., see Darensbourg, D.J. L1
Keller, A. and Matusiak, R.
Reaction of alkylidenedinitrosylmolybdenum complexes with vinyl trisubstituted silanes and substituted acetylenes 213
Khader, M.M.
Surface acidity of V_2O_5/Al_2O_3 catalysts: IR and TPD studies 85
Kiennemann, A., see Demri, D. 237
Kim, J.-J., see Lee, J.K. 311
Kohlpaintner, C.W., see Beller, M. 17
Kozlova, A.P., see Bruk, L.G. 9
Krause, H.W., Schmidt, U., Taudien, S., Costisella, B. and Michalik, M.
Aminophosphine phosphinites of propranolol analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147
Kuroki, M., see Sato, S. 171
Kwak, J.H., see Cho, I.H. 285
Labinger, J.A., see Birnbaum, E.R. 119
Landmesser, H., see Voskobojnikov, T.V. 299
Lee, J.K., Song, I.K., Lee, W.Y. and Kim, J.-J.
Modification of 12-molybdophosphoric acid catalyst by blending with polysulfone and its catalytic activity for 2-propanol conversion reaction 311
Lee, W.Y., see Lee, J.K. 311
Leinonen, T., see Garoff, T. 205
Lewis, L.N. and Sumpter, C.A.
Cyclodextrin modification of the hydrosilylation reaction 293
Liska, F., see Budka, J. 201
Liu, Z.-L., Huang, J.-W. and Ji, L.-N.
The preparation of some polystyrene-supported porphyrinatoiron(III) and their catalysis in hydroxylation of cyclohexane with molecular oxygen 193
Lu, M.-C., see Wu, H.-S. 139
Luna, D., see Bautista, F.M. 229
Maciel, G.E., see Sato, S. 171
Marinas, J.M., see Bautista, F.M. 229
Martínez, M., see Salmón, M. 127
Matusiak, R., see Keller, A. 213
Michalik, M., see Krause, H.W. 147
Miranda, R., see Cabrera, A. L5
Miranda, R., see Salmón, M. 127
Mody, H.M., see Chatterjee, D. 115
Moro, S., see Conte, V. 159
Mota, C.J.A., see Falabella Sousa-Aguiar, E. 267
Murta Valle, M.L., see Falabella Sousa-Aguiar, E. 267
Nageswara Rao, N. and Dube, S.
Photocatalytic degradation of mixed surfactants and some commercial soap/detergent products using suspended TiO_2 catalysts 197
Narayanan, S. and Deshpande, K.
Mechanism of aniline alkylation over vanadia and supported vanadia 109
Navio, J.A., Garcia Gómez, M., Pradera Adrian, M.A. and Fuentes Mota, J.
Partial or complete heterogeneous photocatalytic oxidation of neat toluene and 4-picoline in liquid organic oxygenated dispersions containing pure or iron-doped titania photocatalysts 329
Nozaki, F., see Sato, S. 171
Ocskó, J., see Pálinkó, I. 261
Oehme, G., see Čapka, M. 123
Oshanina, I.V., see Bruk, L.G. 9
Paetzold, E., see Čapka, M. 123
Pálinkó, I. and Ocskó, J.
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Park, S.B., see Cho, I.H. 285
Peón, J., see Cabrera, A. L5
Pinhel da Silva, M., see Falabella Sousa-Aguiar, E. 267
Pradera Adrian, M.A., see Navio, J.A. 329
Rao, B.S., see Singh, P.S. 101
Salmón, A., see Cabrera, A. L5
Salmón, M., see Cabrera, A. L5
Salmón, M., Zavala, N., Cabrera, A., Cárdenas, J., Gaviño, R., Miranda, R. and Martínez, M.
Aromatic substitution reactions of benzyl derivatives with a bentonite clay 127
Sato, S., Kuroki, M., Sodesawa, T., Nozaki, F. and Maciel, G.E.
Surface structure and acidity of alumina–boria catalysts 171
Schmidt, U., see Krause, H.W. 147
Schulz-Ekloff, G., see Voskobojnikov, T.V. 299
Scrimin, P., see Budka, J. 201
Shpiro, E.S., see Voskobojnikov, T.V. 299
Singh, P.S., Bandyopadhyay, R. and Rao, B.S.
Spectroscopic studies of vanadium incorporated SAPO-11 101
Sodesawa, T., see Sato, S. 171
Song, I.K., see Lee, J.K. 311
Stafford, N.W., see Darensbourg, D.J. L1
Sumpter, C.A., see Lewis, L.N. 293
Suppiah, S., see Huang, M. 131
Taudien, S., see Krause, H.W. 147
Tecilla, P., see Budka, J. 201
Temkin, O.N., see Bruk, L.G. 9

Journal of Molecular Catalysis A: Chemical 104 (1996) 345–350

JOURNAL OF MOLECULAR CATALYSIS A: CHEMICAL

Subject Index

Acetone
Modification of 12-molybdophosphoric acid catalyst by blending with polysulfone and its catalytic activity for 2-propanol conversion reaction 311

Acetylene
Mechanistic study of acetylene carbonylation to anhydrides of dicarboxylic acids in solutions of palladium complexes 9

Acetylenes
Reaction of alkylidenedinitrosylmolybdenum complexes with vinyl trisubstituted silanes and substituted acetylenes 213

Acidic sites
Mechanism of aniline alkylation over vanadia and supported vanadia 109

Acidity
Acidity and catalytic properties of $AlPO_4$-11, SAPO-11, MAPO-11, NiAPO-11, MnAPO-11 and MnAPSO-11 molecular sieves 93

Acid sites
Surface structure and acidity of alumina–boria catalysts 171

Adsorption
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237

AEL topology
Acidity and catalytic properties of $AlPO_4$-11, SAPO-11, MAPO-11, NiAPO-11, MnAPO-11 and MnAPSO-11 molecular sieves 93

Alkoxysilylated phosphines
[2-(3-Trimethoxysilylthio)ethyl]diphenylphosphine – a new agent for transition metal immobilization 123

Alkylation
Mechanism of aniline alkylation over vanadia and supported vanadia 109

Alkylidene
Reaction of alkylidenedinitrosylmolybdenum complexes with vinyl trisubstituted silanes and substituted acetylenes 213

^{27}Al NMR
Characterization of Mo/Al_2O_3 sol–gel catalyst by ^{27}Al nuclear magnetic resonance spectroscopy 285

Alumina
Characterization of Mo/Al_2O_3 sol–gel catalyst by ^{27}Al nuclear magnetic resonance spectroscopy 285

Alumina–boria
Surface structure and acidity of alumina–boria catalysts 171

Aluminophosphate
Acidity and catalytic properties of $AlPO_4$-11, SAPO-11, MAPO-11, NiAPO-11, MnAPO-11 and MnAPSO-11 molecular sieves 93

Aluminum molybdate
Characterization of Mo/Al_2O_3 sol–gel catalyst by ^{27}Al nuclear magnetic resonance spectroscopy 285

Aminophosphine
Aminophosphine phosphinites of propranolol analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147

Aniline
Mechanism of aniline alkylation over vanadia and supported vanadia 109

Asymmetric hydrogenation
Aminophosphine phosphinites of propranolol analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147

Bentonite clay
Aromatic substitution reactions of benzyl derivatives with a bentonite clay 127

Benzyl ethers
Aromatic substitution reactions of benzyl derivatives with a bentonite clay 127

Bimetallic catalysts
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229

^{11}B MAS NMR
Surface structure and acidity of alumina–boria catalysts 171

Bromoethylbenzene
Phenolyses of 1-bromoethylbenzene by phase-transfer catalysis in a heterogeneous two-phase system 139

Brønsted acid sites
Surface structure and acidity of alumina–boria catalysts 171

Carbon dioxide
Supercritical carbon dioxide as solvent for the copolymerization of carbon dioxide and propylene oxide using a heterogeneous zinc carboxylate catalyst L1
Carbon monoxide
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, $NO–C_3H_8$ reactions 273
Carbonylation
Mechanistic study of acetylene carbonylation to anhydrides of dicarboxylic acids in solutions of palladium complexes 9
Progress in hydroformylation and carbonylation 17
Catalysis
Catalysis of gas and liquid phase ionic and radical rearrangements of α- and β-pinene by metal(IV) phosphate polymers 251
Ceria
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, $NO–C_3H_8$ reactions 273
Chiral Rh complexes
Aminophosphine phosphinites of propranolol analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147
Consecutive hydrogenation
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Copper
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Cracking
Catalytic cracking of decalin isomers over REHY-zeolites with different crystallite sizes 267
Crown ethers
Clay-mediated cyclooligomerization of olefin oxides: a one-pot route to crown ethers L5
Cyclodextrin
Cyclodextrin modification of the hydrosilylation reaction 293
Cyclohexane
The preparation of some polystyrene-supported porphyrinatoiron(III) and their catalysis in hydroxylation of cyclohexane with molecular oxygen 193
Cyclooligomerization
Clay-mediated cyclooligomerization of olefin oxides: a one-pot route to crown ethers L5
Degradation
Photocatalytic degradation of mixed surfactants and some commercial soap/detergent products using suspended TiO_2 catalysts 197
Dioxanes
Clay-mediated cyclooligomerization of olefin oxides: a one-pot route to crown ethers L5
Dioxolanes
Clay-mediated cyclooligomerization of olefin oxides: a one-pot route to crown ethers L5
Epoxides
Clay-mediated cyclooligomerization of olefin oxides: a one-pot route to crown ethers L5
ESR
Spectroscopic studies of vanadium incorporated SAPO-11 101
Ester
Micellar nickel(II)-2-pyridineketoxime complexes as powerful catalysts of the cleavage of carboxylic acid esters in weakly acidic conditions 201
Ethyl linolate
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Film catalyst
Modification of 12-molybdophosphoric acid catalyst by blending with polysulfone and its catalytic activity for 2-propanol conversion reaction 311
Formaldehyde
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
Formyl
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
FTIR
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, $NO–C_3H_8$ reactions 273
Gas phase
Catalysis of gas and liquid phase ionic and radical rearrangements of α- and β-pinene by metal(IV) phosphate polymers 251
Heterogeneous catalysis
Clay-mediated cyclooligomerization of olefin oxides: a one-pot route to crown ethers L5
Heteropoly acid
Modification of 12-molybdophosphoric acid catalyst by blending with polysulfone and its catalytic activity for 2-propanol conversion reaction 311

High temperature effects
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Homogeneous catalysis
Progress in hydroformylation and carbonylation 17
Hydrodesulfurization
Characterization of Mo/Al_2O_3 sol–gel catalyst by ^{27}Al nuclear magnetic resonance spectroscopy 285
Hydroformylation
Progress in hydroformylation and carbonylation 17
Hydrogen
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Hydrogenation
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Hydroperoxide
The inactivation of horseradish peroxidase by *m*-chloroperoxybenzoic acid, a xenobiotic hydroperoxide 179
Hydrosilylation
Cyclodextrin modification of the hydrosilylation reaction 293
Hydroxylation
The preparation of some polystyrene-supported porphyrinatoiron(III) and their catalysis in hydroxylation of cyclohexane with molecular oxygen 193
Immobilization
|2-(3-Trimethoxysilylthio)ethyl|diphenylphosphine – a new agent for transition metal immobilization 123
Inactivation
The inactivation of horseradish peroxidase by *m*-chloroperoxybenzoic acid, a xenobiotic hydroperoxide 179
Iron
The preparation of some polystyrene-supported porphyrinatoiron(III) and their catalysis in hydroxylation of cyclohexane with molecular oxygen 193
Ketoxime derivatives
Micellar nickel(II)-2-pyridineketoxime complexes as powerful catalysts of the cleavage of carboxylic acid esters in weakly acidic conditions 201
Kinetics
Phenolyses of 1-bromoethylbenzene by phase-transfer catalysis in a heterogeneous two-phase system 139
The inactivation of horseradish peroxidase by *m*-chloroperoxybenzoic acid, a xenobiotic hydroperoxide 179
Ligand–magnetic shielding correlations
Studies directed toward the prediction of the oxidative reactivity of vanadium peroxo complexes in water. Correlations between the nature of the ligands and ^{51}V-NMR chemical shifts 159
Magnesium dichloride
Mn doping of the Ziegler–Natta PP catalyst support material 205
Maleic anhydride
Mechanistic study of acetylene carbonylation to anhydrides of dicarboxylic acids in solutions of palladium complexes 9
Manganese dichloride
Mn doping of the Ziegler–Natta PP catalyst support material 205
Mechanism
Mechanism of aniline alkylation over vanadia and supported vanadia 109
Metallomicelle
Micellar nickel(II)-2-pyridineketoxime complexes as powerful catalysts of the cleavage of carboxylic acid esters in weakly acidic conditions 201
Metathesis
Reaction of alkylidenedinitrosylmolybdenum complexes with vinyl trisubstituted silanes and substituted acetylenes 213
Methanol
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
Methyloxirane
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Molecular sieves
Acidity and catalytic properties of $AlPO_4$-11, SAPO-11, MAPO-11, NiAPO-11, MnAPO-11 and MnAPSO-11 molecular sieves 93
Molybdenum
Reaction of alkylidenedinitrosylmolybdenum complexes with vinyl trisubstituted silanes and substituted acetylenes 213
Characterization of Mo/Al_2O_3 sol–gel catalyst by ^{27}Al nuclear magnetic resonance spectroscopy 285
Montmorillonite
Mechanism of aniline alkylation over vanadia and supported vanadia 109

Naphthenes
Catalytic cracking of decalin isomers over REHY-zeolites with different crystallite sizes 267
Nickel
Micellar nickel(II)-2-pyridineketoxime complexes as powerful catalysts of the cleavage of carboxylic acid esters in weakly acidic conditions 201
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Nitric oxide adsorption
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, $NO–C_3H_8$ reactions 273
Nitrosyl
Reaction of alkylidenedinitrosylmolybdenum complexes with vinyl trisubstituted silanes and substituted acetylenes 213
NMR data
Aminophosphine phosphinites of propranolol analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147
Oligomerization
Aromatic substitution reactions of benzyl derivatives with a bentonite clay 127
Organometallic complexes
Progress in hydroformylation and carbonylation 17
Oxidation
Partial or complete heterogeneous photocatalytic oxidation of neat toluene and 4-picoline in liquid organic oxygenated dispersions containing pure or iron-doped titania photocatalysts 329
Palladium
Mechanistic study of acetylene carbonylation to anhydrides of dicarboxylic acids in solutions of palladium complexes 9
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Peroxidase
The inactivation of horseradish peroxidase by *m*-chloroperoxybenzoic acid, a xenobiotic hydroperoxide 179
Peroxo vanadium complexes
Studies directed toward the prediction of the oxidative reactivity of vanadium peroxo complexes in water. Correlations between the nature of the ligands and ^{51}V-NMR chemical shifts 159
Phase-transfer catalysis
Phenolyses of 1-bromoethylbenzene by phase-transfer catalysis in a heterogeneous two-phase system 139
Phenolysis
Phenolyses of 1-bromoethylbenzene by phase-transfer catalysis in a heterogeneous two-phase system 139
Phenylmethanes
Aromatic substitution reactions of benzyl derivatives with a bentonite clay 127
Phosphinites
Aminophosphine phosphinites of propranolol analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147
Photocatalysis
Photocatalytic degradation of mixed surfactants and some commercial soap/detergent products using suspended TiO_2 catalysts 197
Partial or complete heterogeneous photocatalytic oxidation of neat toluene and 4-picoline in liquid organic oxygenated dispersions containing pure or iron-doped titania photocatalysts 329
Picolines
Partial or complete heterogeneous photocatalytic oxidation of neat toluene and 4-picoline in liquid organic oxygenated dispersions containing pure or iron-doped titania photocatalysts 329
Pinene
Catalysis of gas and liquid phase ionic and radical rearrangements of α- and β-pinene by metal(IV) phosphate polymers 251
Polymerization
Mn doping of the Ziegler–Natta PP catalyst support material 205
Polystyrene
The preparation of some polystyrene-supported porphyrinatoiron(III) and their catalysis in hydroxylation of cyclohexane with molecular oxygen 193
Polysulfone
Modification of 12-molybdophosphoric acid catalyst by blending with polysulfone and its catalytic activity for 2-propanol conversion reaction 311
Porphyrins
The preparation of some polystyrene-supported porphyrinatoiron(III) and their catalysis in hydroxylation of cyclohexane with molecular oxygen 193
Pressure dependence
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
2-Propanol
Modification of 12-molybdophosphoric acid catalyst by blending with polysulfone and its catalytic activity for 2-propanol conversion reaction 311
Propranolol
Aminophosphine phosphinites of propranolol

analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147
Propylene
Mn doping of the Ziegler–Natta PP catalyst support material 205
Propylene oxide
Supercritical carbon dioxide as solvent for the copolymerization of carbon dioxide and propylene oxide using a heterogeneous zinc carboxylate catalyst L1
Pyridine derivatives
Micellar nickel(II)-2-pyridineketoxime complexes as powerful catalysts of the cleavage of carboxylic acid esters in weakly acidic conditions 201
Rearrangement
Catalysis of gas and liquid phase ionic and radical rearrangements of α- and β-pinene by metal(IV) phosphate polymers 251
Rhodium
[2-(3-Trimethoxysilylthio)ethyl] diphenylphosphine – a new agent for transition metal immobilization 123
C_1-oxygenated molecules adsorbed on rhodium containing catalysts. Identification of a formyl species 237
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, $NO–C_3H_8$ reactions 273
Ring-opening reactions
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
SAPO-11
Spectroscopic studies of vanadium incorporated SAPO-11 101
Selectivity
Phenolyses of 1-bromoethylbenzene by phase-transfer catalysis in a heterogeneous two-phase system 139
Sepiolite
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Silica
Mechanism of aniline alkylation over vanadia and supported vanadia 109
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Site energy distribution
Acidity and catalytic properties of $AlPO_4$-11, SAPO-11, MAPO-11, NiAPO-11, MnAPO-11 and MnAPSO-11 molecular sieves 93
Sol–gel
Characterization of Mo/Al_2O_3 sol–gel catalyst by ^{27}Al nuclear magnetic resonance spectroscopy 285
Solid acids
Mechanism of aniline alkylation over vanadia and supported vanadia 109
Steric influence
Aminophosphine phosphinites of propranolol analogues as ligands for Rh-catalyzed asymmetric hydrogenation 147
Succinic anhydride
Mechanistic study of acetylene carbonylation to anhydrides of dicarboxylic acids in solutions of palladium complexes 9
Supercritical CO_2
Supercritical carbon dioxide as solvent for the copolymerization of carbon dioxide and propylene oxide using a heterogeneous zinc carboxylate catalyst L1
Supported catalysts
Mechanism of aniline alkylation over vanadia and supported vanadia 109
The preparation of some polystyrene-supported porphyrinatoiron(III) and their catalysis in hydroxylation of cyclohexane with molecular oxygen 193
Mn doping of the Ziegler–Natta PP catalyst support material 205
Influence of Ni–Cu alloying on Sepiolite-supported nickel catalysts in the liquid-phase selective hydrogenation of fatty acid ethyl esters 229
Hydrogen pressure dependence in the ring opening of methyloxirane over silica-supported Pd and Rh catalysts: effect of high temperature on ring-opening routes 261
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, $NO–C_3H_8$ reactions 273
Surfactants
Photocatalytic degradation of mixed surfactants and some commercial soap/detergent products using suspended TiO_2 catalysts 197
Synthesis
Phenolyses of 1-bromoethylbenzene by phase-transfer catalysis in a heterogeneous two-phase system 139
Titania
Spectroscopic characterization of the CeO_2/TiO_2 and $Rh–CeO_2/TiO_2$ systems: CO adsorption and NO–CO, $NO–C_3H_8$ reactions 273
Partial or complete heterogeneous photocatalytic oxidation of neat toluene and 4-picoline in liquid organic oxygenated dispersions containing pure or iron-doped titania photocatalysts 329

Titanium dioxide
Photocatalytic degradation of mixed surfactants and some commercial soap/detergent products using suspended TiO_2 catalysts 197
Toluene
Partial or complete heterogeneous photocatalytic oxidation of neat toluene and 4-picoline in liquid organic oxygenated dispersions containing pure or iron-doped titania photocatalysts 329
TPR
Spectroscopic studies of vanadium incorporated SAPO-11 101
Vanadia
Mechanism of aniline alkylation over vanadia and supported vanadia 109
Vanadium
Spectroscopic studies of vanadium incorporated SAPO-11 101
VAPSO-11
Spectroscopic studies of vanadium incorporated SAPO-11 101
Vinyl silanes
Reaction of alkylidenedinitrosylmolybdenum complexes with vinyl trisubstituted silanes and substituted acetylenes 213
^{51}V MAS-NMR
Spectroscopic studies of vanadium incorporated SAPO-11 101
^{51}V-NMR spectroscopy
Studies directed toward the prediction of the oxidative reactivity of vanadium peroxo complexes in water. Correlations between the nature of the ligands and ^{51}V-NMR chemical shifts 159
Zeolites
Catalytic cracking of decalin isomers over REHY-zeolites with different crystallite sizes 267
Ziegler–Natta catalysis
Mn doping of the Ziegler–Natta PP catalyst support material 205
Zinc carboxylate catalyst
Supercritical carbon dioxide as solvent for the copolymerization of carbon dioxide and propylene oxide using a heterogeneous zinc carboxylate catalyst L1
Zirconium phosphate
Catalysis of gas and liquid phase ionic and radical rearrangements of α- and β-pinene by metal(IV) phosphate polymers 251
